

Essential Cloud Security

Continuous Security Posture Monitoring, Compliance Tracking & Risk Prioritization Across Your Multi-Cloud Environment

Blue Island Security

NAVIGATE CYBER RISK

Key Features

Continuous Posture Monitoring 24/7
misconfiguration detection across AWS, Azure & GCP with automated drift alerts

Compliance Framework
Alignment Track posture against CIS, SOC 2, PCI-DSS, HIPAA, GDPR & more

Alert Triage & Prioritization
Expert filtering of false positives with risk-based escalation of critical findings

Outcomes

Identify misconfigurations before they become breaches with continuous visibility

Identify misconfigurations before they become breaches with continuous visibility

Cloud environments change constantly. Misconfigurations are the leading cause of cloud breaches, yet most organizations lack visibility into their security posture across AWS, Azure, and GCP workloads.

Essential Cloud Security delivers continuous security monitoring powered by Datadog, with expert analysis and prioritized recommendations so you know exactly where your risks are.

Visibility into your cloud security posture with expert guidance...

Our managed service provides comprehensive cloud security posture monitoring across your multi-cloud environment. We deploy and manage Datadog CSPM, continuously tracking your configuration against industry compliance frameworks.

Your team receives monthly posture reports with prioritized remediation recommendations, while we handle the alert triage and false positive filtering. Critical findings are escalated next business day giving you confidence that nothing slips through the cracks.

Complete Cloud Security Posture Management

Blue Island Security's Essential Managed CSPM service delivers continuous visibility and compliance tracking across your cloud environments:

What we'll do

1

Deploy & configure
CSPM across your AWS, Azure & GCP Clouds

2

Align compliance
frameworks to your regulatory & security requirements

3

Monitor & triage
alerts with next business day escalation of critical findings

4

Deliver monthly
posture reports with prioritized remediation guidance

Assumptions

- Datadog CSPM licensing included in service
- Onboarding completed within 5 working days
- Coverage includes AWS, Azure, and GCP workloads
- Monthly strategic reviews with security leadership
