

Essential Managed M365 & Azure

Streamline Administration, Optimise Costs & Automate Governance Across Your Microsoft Environment

Blue Island Services

TECHNOLOGY THAT WORKS

Key Features

License Optimization
Automated harvesting of unused licenses with real-time usage analytics

Workflow Automation Self-service user provisioning, offboarding & lifecycle management

Virtual Tenant Segmentation
Delegated administration without compromising control or security

Outcomes

Reduce license waste by 30% while automating 80% of routine administrative tasks

Empower teams with self-service capabilities while maintaining governance and compliance

Managing Microsoft 365's 2,000+ configurations across multiple workloads while optimizing license costs is overwhelming. IT teams waste countless hours on manual provisioning, reporting, and license reconciliation.

Essential Managed M365 and Azure transforms your Microsoft environment into an efficient, automated, and cost-optimized platform.

Maximize your Microsoft investment with intelligent automation...

Our managed service delivers comprehensive administration through a single pane of glass, combining powerful workflow automation with granular delegation capabilities. We identify license waste, automate user lifecycle management, and provide actionable insights.

Your IT team focuses on strategic initiatives while we handle the operational complexity. We eliminate ticket backlogs, reduce manual errors, and provide the governance framework needed for scalable growth—all while cutting your Microsoft spending through intelligent license management.

Complete Microsoft 365 & Azure Management

Blue Island Security's Essential Managed M365 and Azure service simplifies your entire Microsoft ecosystem through automation and optimization:

What we'll do

1

Audit & optimize
license allocation across all Microsoft subscriptions

2

Automated workflows
for user lifecycle & governance

3

Configure Virtual Tenants for delegated regional/departmental control

4

Monthly optimisation
reports with cost-saving recommendations

Assumptions

- Administrative access to Microsoft 365 and Azure tenants
- Coverage includes all M365 workloads and Azure subscriptions
- Initial optimisation assessment completed within 5 working days
- Monthly strategic reviews with IT leadership
